

*We didn't know we were making
memories.
We thought we were simply living.*

Childhood rarely announces the moments that will stay with us. A Saturday morning. A favourite toy. The sound of friends outside. A hand reaching for ours before we knew how much safety mattered.

Echoes of Childhood is an invitation to return to those ordinary moments and discover why they became extraordinary with time. Across twelve reflective chapters, Sabino Pereira explores wonder, friendship, growing up, gratitude and the people who made the world feel like home.

Created as a visual companion to the cinematic instrumental album by Reira Bin, this is not a story about one childhood. It is a quiet space in which to remember your own.
